EMPOWERING INDUSTRY GROWTH WITH **SATELLITE SOLUTIONS**

India's space activities are focused on societal benefits and the long-term sustainability of outer space activity. The country is a founding member of the United Nations Committee on the Peaceful Uses of Outer Space (UN-COPUOS) and has made significant contributions to its work on the Scientific, Technical, and Legal sub-committees.

The India Space Congress 2023 [ISC'23] aims to bring together leaders in the space industry to discuss ways to increase growth and development in India's rapidly expanding space sector. The conference, organized by the SatCom Industry Association, will be a multi-stream program exploring the use of satellite technology to improve socio-economic development in India.

SNAPSHOTS FROM ISC'22

THE VISION

India Space Congress (ISC) 2023 will focus on space science, technologies, and applications for support of sustainable economic, social, and environmental development. The conference will also examine the development of science, technology, and innovation policies related to space and its access to all.

The main objective of the conference is to bring together policy-makers, researchers, and academics to integrate space into policy and decision-making, raise awareness about the activities of various entities involved in space, including international and national agencies, industry,

and civil society, and highlight capacity-building efforts and international cooperation and partnerships involving emerging nations and industries. Experts, government officials, and academics from around the world are invited to come together to discuss ways to efficiently use space technology to contribute to socioeconomic development in various ways. Satellite-based communication systems can provide internet access and connectivity to remote and underserved areas, enabling people in these regions to access information and communication technologies and participate in the global economy.

WHO SHOULD PARTICIPATE

- ▶ Govt Departments, Regulators & Policymakers
- ▶ Satellite Operators and Service Providers
- ▶ Broadcasters/DTH Service Providers
- ▶ Satellite system integrators and Launch vehicles
- ▶ Ground and Terminal equipment manufacturers and suppliers
- ▶ Software and Application developers
- ▶ Satellite-based IOT/M2M
- ▶ Deep Tech startups, Incubators, Innovation hubs and Space Parks
- ▶ Academic and R&D institutions
- ▶ Standards bodies
- ▶ Law firms
- ▶ Geospatial Segments - Earth Observation - Remote Sensing
- ▶ User Segments: Agriculture, Aviation & Maritime, O&G, Defence, Railways, Healthcare, Banking and Fintech
- ▶ VSAT Manufacturers & Distributors
- ▶ Defence Security Forces
- ▶ Telecom Service Providers
- ▶ Venture Capital Firms

GLIMPSES OF ISC 2022

The 1st Edition of India Space Congress held from 26-28 Oct-2022 at New Delhi.

The 3-day India Space Congress saw over 650 delegates with 35 Sessions and 180 experts from over 30 countries deliver excellent insights and valuable suggestions for SIA-India to play a pivotal role for academia-industry interaction, catalysing the start-up community, technology & business models, business opportunities, growth & market access, standardisation, policy and regulatory landscape.
