India Space Congress - 2023

Direct to Device (D2D)

H. Rayappa
Director, SATCOM-PO
ISRO HQ, Department of Space
Bengaluru

Direct to Device (D2D)

- ▶ Direct to Device (D2D) is a transformative technological development
- Standard smartphones and IoT devices will be able to connect seamlessly with traditional cellular base stations and satellite systems
- ▶ 570 million people, or 8.7% of the adult population those living out of network coverage and on the 'edge' of coverage.
- ► IOT /M2M is another niche area
- ► No Dish & No Cell infra enables improved cost and operational efficiency to mobile operators.
- ▶ \$30 billion by 2035 *

Direct to Device (D2D)

- 5G NTN offers the foundation
- ► The technical challenges of realizing chipsets for New Radio
- Dealing with the issues of Doppler shift, seamless switching
- Spectrum usage the one used by IMT or the MSS or different or both
- Who to lead Partnership platforms of satellite operators and telcos.
- ► AST SpaceMobile Testing is a milestone

Going to be a Game Changer.

THANK YOU
